

# SPACE TOWER

The ultimate solution  
for larder units

 **blum**<sup>®</sup>

# More space in the kitchen

SPACE TOWER can be accessed with impressive ease, provides ample space for provisions and can be tailored to each customer's individual needs. In short, this well-thought-out larder unit makes everyday kitchen use a piece of cake.

## Contents

- 06 Flexible storage
- 08 A wide range of options
- 10 Compatible with all box systems
- 12 In every living area
- 14 Great design scope
- 16 Ideas for practical kitchens
- 18 moving ideas

### Workflow – Convenience

It is important that people are able to access their provisions when using their kitchen, which is why SPACE TOWER needs to be located in an easy to reach position in the room, enabling good workflows.

## All-round access

Larder units are used more frequently than you would think. This is why they really need to be convenient to use. SPACE TOWER's pull-outs can be opened individually, giving you clear visibility and direct access to contents.

### Access from three sides

SPACE TOWER makes use of the full depth of your cabinet. Thanks to full extension, you have easy access to all contents from the left, right and even from the front.

### Removal from above

Each full extension can be opened individually and is fully visible from above, meaning you can quickly find the item you need and then remove it from above with ease.

### Light operating forces

You only need to open the pull-out that contains the item you need. The light operating forces make the larder unit incredibly convenient to use.

# Flexible storage

The primary objective of SPACE TOWER is to provide ample storage space. This clever cabinet solution makes full use of the space available. Provisions are kept together and clearly organised.

#### High, closed drawer boxes

High, closed drawer boxes ensure that provisions are stored securely, meaning that nothing can fall out from the side or the back.

#### Flexible inner dividers

Inner dividing systems beautifully organise storage space and allow you to keep everything nice and tidy. They also securely hold provisions so that flour, sugar and rice won't tip over.

#### High load bearing capacity

Each pull-out boasts high stability and impressive load bearing capacity (up to a total weight of 70 kg) so the larder unit can even safely hold heavy items such as bottles.

#### Space – Optimisation

SPACE TOWER provides plenty of storage for a large number of items and makes full use of the space available in your kitchen. Practical inner dividing systems can be flexibly arranged to keep contents nice and tidy.

## A wide range of options

SPACE TOWER comes in all heights, widths and depths and can be tailored to your individual storage space needs. The wide range of options means that this practical larder unit uses every inch of space available in your kitchen.

### **Motion – Quality**

Top quality motion is a real feel-good factor and makes everyday kitchen use easy. You can equip SPACE TOWER with an electrical or mechanical motion support system to suit your specific needs.

[www.blum.com/motion](http://www.blum.com/motion)

**Be it narrow**

SPACE TOWER is also ideal for tight kitchens because even smaller models of the larder unit can accommodate large amounts of food.

**Or wide**

Should your kitchen be more spacious, a wide SPACE TOWER larder unit provides ample space to hold food for a big family.

**The ultimate in convenience**

Pull-outs open automatically with the SERVO-DRIVE electrical motion support system – a light touch is all that is required. BLUMOTION ensures soft and effortless closing.

# Compatible with all box systems

SPACE TOWER gives you great design freedom. The larder unit can be implemented with LEGRABOX, MERIVOBX and TANDEMBOX – three box systems that provide endless scope for design. You can create a consistent design throughout the whole kitchen if the customer so wishes.

## LEGRABOX

With its super slim drawer sides and numerous customisation options, LEGRABOX is the box system for maximum design flexibility.

## MERIVOBX

MERIVOBX is based on a platform concept, allowing you to combine different drawer side accessories as you wish.

## TANDEMBOX antaro

The efficient TANDEMBOX antaro box system has a clear-cut, rectangular design and a timeless look.

## In every living area

This practical kitchen solution is also suitable for other living areas. SPACE TOWER provides ample storage space and easy access to contents so it is also ideal for bedrooms, hallways and bathrooms.

SPACE TOWER provides ample storage space and easy access to contents, making it ideal for bedrooms.

Toiletries in bathrooms are kept nice and tidy and are immediately to hand. SPACE TOWER equipped with LEGRABOX pure in silk white matt.

# Great design scope

To ensure that every SPACE TOWER wows users, we've put together some useful design tips for planning your application. Pull-outs can be flexibly positioned within the cabinet so you can adapt interiors to storage items. This gives you even more design freedom.

In high cabinets, it's practical to have a shelf that is clearly visible from the front as the highest level. The inner drawer underneath makes it easier to access storage items from the side.

You can position the inner pull-outs at different heights within the cabinet so no items will be too tall to store.

If the hinge is mounted above the lowest pull-out, the pull-out can be inserted right at the bottom, making the most of those last few inches of usable storage space.

It is easy to work out the fittings and drilling positions you need using the online Product Configurator – just head to:

## Blum's ideas for practical kitchens

Kitchens have to withstand the rigours of everyday use. Blum has been investigating the needs of kitchen users for years and has come up with a multitude of ideas to make modern kitchens even more practical.

**Workflow – Convenience**

Meal preparation and clean-up are daily recurring activities or 'workflows'. If you keep everything exactly where you need it, kitchen chores will run like clockwork.

**Space – Optimisation**

You can never have enough storage space. But the amount of storage you really need depends on your personal requirements. Careful planning will allow you to make full use of the space available.

**Motion – Quality**

Top quality fittings deliver enhanced convenience and make your life easier. Furniture should be easy to open, have a feather-light glide even when heavily laden and close softly and effortlessly with BLUMOTION.

A bright, modern kitchen with a woman sitting on a black stool at a long wooden kitchen island. A man is standing in the background, smiling and cooking. The kitchen features a large window, a dining table with chairs, and a wooden floor with a herringbone pattern. The lighting is warm and natural, with sunlight streaming in from the window.

# moving ideas

We believe that ideas can move the world. We offer innovative fittings, inspiring furniture concepts and appropriate services so that you can turn your creative ideas into reality. We are driven by your needs, international trends and our shared vision of a better quality of living. Let us work together to create moving ideas.

## Quality of living

We would like you to enjoy greater convenience and functionality when using furniture.

## Product range

Everything from a single source: our wide range of products allows you to keep up with today's and tomorrow's trends.

## Inspiration

We monitor global trends and strive to create the solutions of tomorrow. We like to share our insights with you.

## Innovation

We stay in motion. Curiosity and pioneering spirit drive us to develop new products and services for you.

## Services

We support your daily operations with customised services tailored to your processes.

## Quality

We continuously strive to improve our products, services and ourselves.

## Trust

We take responsibility for partnerships, our employees, society and the environment.

Julius Blum started our journey in 1952 with horseshoe studs. Today we supply innovative fittings to customers in over 120 countries.
